

Serial No.: 09/996,087

LISTING OF CLAIMS

What is claimed is:

1. (currently amended) A method comprising:

associating multi-lingual audio recordings with visual objects in a presentation system accessed by the Internet network, wherein a plurality of visual objects, including at least one of a chart, a slide and another presentation object, such as charts and/or slides controlled by a third party in a server can be accessed by any user of said Internet network, said visual objects being associated each with an audio recording in a particular language selected from amongst several predetermined languages, said method including the steps of:

calling said third party server by a user in charge of the audio recording associated with a visual object via the Public Switched Network,

prompting said user on said user's telephone to enter said user's user ID; and

transmitting by a keypad of said telephone said user ID including a first part defining a first language to be used for recording said audio recording, whereby displaying of said visual object by said workstation is automatically synchronized with said audio recording.

2. (original) A method according to claim 1, further comprising the step of entering a number assigned to said visual object associated with said audio recording by the user at said telephone after said user has transmitted said user ID.

Serial No.: 09/996,087

1 3. (currently amended) A method according to claim 1, further  
2 comprising the step of transmitting a password by the user at  
3 said telephone after ~~this one has~~ having transmitted said user  
4 ID.

5 4. (original) A method according to claim 3, wherein said user ID  
6 includes a second part defining a directory name wherein the file  
7 containing said audio recording is stored.

8 5. (original) A method according to claim 4, further comprising  
9 the step of generating by said third party server a first file  
10 name including said directory name and a code defining said first  
11 language when ID is received by said third party server.

12 6. (original) A method according to claim 5, wherein said audio  
13 recording in said first language is stored in a data base by  
14 using said first file name.

15 7. (original) A method according to claim 6, further comprising  
16 the steps of transmitting from said telephone another ID  
17 containing a first part defining a second language to be used for  
18 recording said audio recording and a second part defining said  
19 directory name, and generating by said third party server another  
20 file name including said directory name and a code defining said  
21 second language.

22 8. (original) A method according to claim 6, further comprising  
23 the step of copying said audio recording corresponding to said  
24 first file name from said data base to a directory at said  
25 directory name, said step of copying being activated by the user  
26 at said telephone.

Serial No.: 09/996,087

1 9. (currently amended) A method according to claim 8, wherein the  
2 file containing said audio recording includes a flag ~~which is~~ set  
3 when said audio recording is recorded for ~~the~~ one of a first time  
4 ~~or~~ and having been changed, and ~~which~~ is reset when said file is  
5 copied from said data base to said directory.

6 10. (currently amended) A presentation system accessed by the  
7 Internet network wherein a plurality of visual objects, including  
8 at least one of a chart, a slide and another presentation object,  
9 ~~such as charts and/or slides~~ controlled by a third party in a  
10 server can be accessed by any user of said Internet network, said  
11 visual objects being associated each with an audio recording in  
12 any language selected amongst several predetermined languages;  
13 said system comprising:

14 a third party server including processing means for receiving a  
15 user ID from a user telephone,

16 said user ID comprising a first part defining a first language to  
17 be used for recording said audio recording whereby displaying of  
18 said visual object by said workstation is automatically  
19 synchronized with said audio recording.

20 11. (original) A system according to claim 10, wherein said third  
21 party server comprises a table for determining said language to  
22 be used for recording said audio recording from said first part  
23 in said user ID.

24 12. (original) A system according to claim 11, wherein said user  
25 ID includes a second part defining a directory name, wherein the  
26 file containing said audio recording is stored, and further  
27 comprising a directory to store said audio recording at a  
28 location determined by said directory name.

DOCKET NUMBER: FR20000043US1

-4/19-

Serial No.: 09/996,087

1 13. (original) A system according to claim 11, further comprising  
2 a data base wherein said file containing said audio recording is  
3 stored after being recorded.

4 14. (original) A system according to claim 12, wherein said file  
5 containing said audio recording is copied in said directory after  
6 activation of said processing means by the user at said  
7 telephone.

8 15. (currently amended) An apparatus comprising:

9 means for associating multi-lingual audio recordings with visual  
10 objects in a presentation system accessed by the Internet  
11 network, wherein a plurality of visual objects, including at  
12 least one of a chart, a slide and another presentation object,  
13 ~~such as charts and/or slides~~ controlled by a third party in a  
14 server can be accessed by any user of said Internet network, said  
15 visual objects being associated each with an audio recording in a  
16 particular language selected from amongst several predetermined  
17 languages, said means for associating including:

18 means for calling said third party server by a user in  
19 charge of the audio recording associated with a visual  
20 object via the Public Switched Network,

21 means for prompting said user on said user's telephone to  
22 enter said user's user ID; and

23 means for transmitting by a keypad of said telephone said  
24 user ID including a first part defining a first language to  
25 be used for recording said audio recording, whereby

DOCKET NUMBER: FR20000043US1

-5/19-

Serial No.: 09/996,087

1 displaying of said visual object by said workstation is  
2 automatically synchronized with said audio recording.

3 16. (original) An apparatus according to claim 15, further  
4 comprising means for entering a number assigned to said visual  
5 object associated with said audio recording by the user at said  
6 telephone after said user has transmitted said user ID.

7 17. (original) An apparatus according to claim 15, further  
8 comprising means for transmitting a password by the user at said  
9 telephone after this one has transmitted said user ID.

10 18. (original) An apparatus according to claim 17, further  
11 comprising means for generating by said third party server a  
12 first file name including said directory name and a code defining  
13 said first language when ID is received by said third party  
14 server.

15 19. (original) An article of manufacture comprising a computer  
16 usable medium having computer readable program code means  
17 embodied therein for causing association of multi-lingual audio  
18 recordings with visual objects, the computer readable program  
19 code means in said article of manufacture comprising computer  
20 readable program code means for causing a computer to effect the  
21 steps of claim 1.

22 20. (original) A computer program product comprising a computer  
23 usable medium having computer readable program code means  
24 embodied therein for causing a presentation system accessed by  
25 the Internet network, the computer readable program code means in  
26 said computer program product comprising computer readable  
27 program code means for causing a computer to effect the functions  
28 of claim 10.
